

KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Coutts Multi Asset Global Defensive Fund (the “Fund”), a sub-fund of the Equator ICAV

USD Share Class B Distributing (ISIN: IE00B7D3X615)

This Fund is managed by RBS Asset Management (Dublin) Limited.

OBJECTIVES AND INVESTMENT POLICY

Objective

The Fund aims to increase in value over the medium term through a diversified portfolio of investments. The majority of the Fund will be invested in bonds. The return will reflect income received with some potential for capital appreciation.

Investment Policy

The Fund has discretion to invest globally across multiple types of investments. The Fund will invest mainly in bonds (debt issued by companies, governments or other entities), the majority of which will be Investment Grade, where the credit risk is considered to be lower than for non-Investment Grade bonds. Investments may also include equities (shares in companies) and cash, in any currency. The Fund can invest via collective investment schemes or directly.

The Fund may use financial derivative instruments (“FDIs”) for efficient portfolio management only. This is an investment technique that allows the use of FDIs for at least one of the following purposes: to increase the value of the Fund; to protect the value of the Fund or to reduce the risks of certain investments.

The base currency of the Fund is USD.

This Fund offers GBP and EUR currency hedged share classes which aim to provide GBP or EUR investors a degree of protection from currency fluctuations of the base currency of the Fund (USD) and base currency of the investor.

This is an active fund which means the Investment Manager makes the decisions about how to invest the Fund’s money. The Fund aims to take into account certain Environmental, Social and Governance (ESG) themes and considerations as described in the section entitled ESG Policy in the Prospectus. At least 20% of the Net Asset Value of the Fund will be investments that are on a Net Zero Trajectory (as defined and described in the ESG Policy).

Benchmark

The Benchmark has been created by the Investment Manager to represent the level of risk of the Fund. The indices and weights used within the Benchmark to represent particular asset classes have been chosen to provide an appropriate representation of those asset classes at a reasonable cost. The benchmark is used to constrain the risk of the fund but the Investment Manager will choose the assets held by the Fund and does not aim to track the benchmark or mirror the weights.

Asset	Benchmark	Weight
Government Bonds	Bloomberg Global G7 Index (USD hedged)	50.00%
Investment Grade Corporate Bonds	Bloomberg Barclays Global Aggregate Credit Total Return Index Hedged USD	25.00%
Global Equity shares	MSCI AC World ESG Screened Index* (USD)	25.00%

*A custom index calculated by MSCI based on screening criteria provided by the Investment Manager

Dealing

You can usually buy or sell shares on each business day of the Fund (i.e. any day on which the London Stock Exchange is open for business).

Income

If you invest in distributing shares the Fund aims to distribute available income every six months. If you invest in accumulation shares the Fund will add any available income to the value of your shares.

Profile of a Typical Investor

This Fund is designed for retail customers with little or no experience of investing in collective investment schemes and basic or no knowledge of the characteristics and risks of investing in equities and bonds.

A typical investor in the Fund has a low to medium tolerance for risk; they accept that the value of their investment may fluctuate and they have a low to medium tolerance to bear losses to their capital. The minimum investment horizon is 3 years.

RISK AND REWARD PROFILE

The Risk and Reward Indicator

The risk category was calculated using historical fund performance data over the last 5 years and it may not be a reliable indicator of the Fund’s future risk profile. The risk and reward indicator of the Fund is not guaranteed and may change over time. Even the lowest category 1 does not mean a risk free investment.

Funds in category 7 have shown high volatility in the past. This means the funds have experienced a high range of price change over a given period of time. If the price stays relatively stable, the fund is said to have a low volatility.

This Fund is ranked at 4 because funds of this type have experienced average rises and falls in value in the past.

Key Risks

The value of equity shares depends on the financial state of the underlying companies. Any fall in the financial outlook for, or failure of, such companies can reduce the return on your investment.

Issuers of bonds may fail to meet their regular interest and/or capital repayment obligations owed to the holder of the bond. Typically a higher yielding bond indicates a higher risk that the issuer may fail to meet payments due.

Investing in assets denominated in a currency other than that of the investor or the reference currency of the Fund introduces the impact of currency fluctuations when not hedged. Economic, political or other events may impact markets as a whole temporarily or over the longer term.

Use of financial derivatives may result in the Fund being leveraged and can result in large fluctuations in the value of the Fund. The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Such ESG screening may adversely affect the value of the Fund’s investments compared to a fund without such screening.

CHARGES

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
Charges taken from the Fund over a year	
Ongoing charge	0.88%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The charges are used to pay the costs of running the Fund. These charges reduce the potential growth of your Investment.

Ongoing charges would ordinarily be based on the expenses, for the year ending 30/11/2021 but have been updated to reflect the expenses for the interim period to 31 May and the latest synthetic expenses from investing in other funds. This figure may vary from year to year.

The ongoing charges figure excludes portfolio transaction costs. For more information about charges, please see "Fees and Expenses" in the Fund's Prospectus or consult with your financial adviser / distributor.

You can find details of how to obtain a Prospectus in the Practical Information section below.

PAST PERFORMANCE

This chart shows how much the Fund increased or decreased in value as a percentage in each year.

Performance, calculated in USD, takes account of entry, exit, and ongoing charges and is shown for the USD base share class only. Performance for the EUR and GBP hedged share classes is likely to differ as it will also reflect the interest rate differentials between USD and the currency of the hedged share class, as well as the costs associated with running the currency hedging programme, including trade execution costs, and timing differences between the Valuation Point of the fund and the point that hedging transactions are placed.

The Fund was launched in 2012. The share class was launched in 2013.

Past performance is not a guide to future performance; the value of your investment and any income from it may go down as well as up.

The past performance is shown alongside the Fund's benchmark. The benchmark, in the past, may have been constructed using indices that differ from those currently stated. Changes typically occur as a result of changes in the cost and availability of the indices and are only made without shareholder approval where they do not change the risk profile of the fund.

The current composition of the benchmark was effective from 18/07/2022.

Performance for the Fund takes account of all charges whereas performance for the benchmark is based on Index returns and so does not allow for any charges.

PRACTICAL INFORMATION

Depositary: The Bank of New York Mellon SA/NV, Dublin Branch. You may obtain free of charge the Prospectus, the Annual and Semi-Annual Report and Accounts online at www.coutts.com/cmef.

The share price is published daily on www.coutts.com/cmef. The Fund is subject to the tax laws of Ireland. This may have an impact on your personal tax position. You should take professional tax advice.

Details of the remuneration policy in respect of the Fund are available at www.coutts.com/cmef and a paper copy will be provided, free of charge, upon request.

RBS Asset Management (Dublin) Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the prospectus for the Fund.

The Fund is a sub-fund of the Equator ICAV.

The assets of each sub-fund are segregated from the other sub-funds. The Prospectus, the Annual and Semi-Annual Report and Accounts that are prepared refer to all sub-funds of the Equator ICAV.

You may switch into shares of another sub-fund of the Equator ICAV, as explained in the section of the Prospectus entitled "Exchange of Shares".
